<https://github.com/strangeAbhi>

Computer Science (AI/ML) undergraduate with experience in ML and robotics systems. Proficient in Python, with working knowledge of ML and robotics, with active involvement in national-level tech and chess competitions. Rated 1563 (AFM) under FIDE; also involved in chess instruction, reflecting structured thinking and decision-making.

Education

The National Institute of Engineering, Mysuru

Sep 2023 - Sep 2027

Bachelor of Engineering in Computer Science and Engineering

Vikhe Patil Memorial School, Pune

Apr 2021 - Mar 2023

High School Certificate in Science with CS

Core Skills

Languages and Development Tools: Python, C, HTML, CSS, JavaScript

Tools: Unix, Version Control System (Git), REST APIs, JIRA Agile

Databases: SQL/NoSQL, MySQL, PostgreSQL, MongoDB

Libraries: Matplotlib, Numpy, Tensorflow, pymysql, sk-learn, Fast API, Express.js

AI/ML: Deep Learning, NLP, Model Evaluation, RAG, Langchain.py

DevOps: CI/CD, GitHub Actions, Docker, AWS (EC2, S3, EBS Amplify)

Experience

Global Chess Coach at Upstep Academy Pvt Ltd.

Apr 2025 - Apr 2026

- Led training of 100+ global students in chess and strategic thinking, leveraging digital tools under the guidance of Grand Master Mr. Viswanathan Anand.
- Designed tech-integrated lesson plans with database driven LMS, resulting in improved student performance outcomes and consistently excellent feedback records.

Event Coordinator – Indo Universal Collaboration for Engineering Education (Anvaya)

Nov 2023 - Jan 2025

- Coordinated national-level technical initiatives, collaborating with cross-institutional teams across India.
- Co-organized “Total Lunar Eclipse 2025” with Indian Institute of Astrophysics and Cosmology Education and Research Training Centre Mysuru, leading outreach and on-ground execution (Sept 2025).

Projects

Mystery Animal Voice Game (ESP32 Router INMP441 I2S Microphone MicroPython)

Sep 2024 - Oct 2024

- Created an ESP32-powered Mystery Animal guessing game for Robotics Club@NIE, where user needs to guess the simulated animal by asking limited 20 yes/no questions using an INMP441 I2S microphone and Python backend.
- Designed an end-to-end pipeline where user questions are processed on a python server, evaluated against mystery-animal logic, and a response is returned to drive red/green LED indicators and buzzer-based audio feedback.
- Core game logic and interaction flow were adapted and derived from Google’s Mystery Animal experiment (2017).
<https://github.com/googlecreativelab/mystery-animal>

Oscar Intelli.AI-Optical System for Chess Analysis & Reasoning (pytorch fastAPI opencv stockfish) Nov 2024 - Dec 2024

- Built a computer vision pipeline using OpenCV + PyTorch to detect chessboard states and convert them to FEN analysis.
- Developed a FastAPI backend with Stockfish engine (python-chess) for position evaluation and best-move suggestions.
- Added an AI-based reasoning layer to flag blunders and explain moves in simple terms, helping players understand decisions.

Delhi Metro Transit Corporation and ChatBot (Python, matplotlib, pyttss, WeatherAPI, SQL)

Oct 2022 - Jan 2023

- Developed a Python-based metro guide providing route details, fare estimates, and travel times across about 230 stations using Matplotlib for mapping and MySQL for data storage.
- Incorporated METROBOT, an AI chatbot, for user queries, FAQ, and assistance.
- Designed real-time news, weather information along with in-chat Wikipedia access in Metrobot.

Achievements

6× Coding Competition / Hackathon Winner

Won 6 inter and intra college coding competitions and hackathon, in problem-solving and rapid development skills.

Chess Distinction – International FIDE Rated (1563) titled AFM & NIE Chess Team Captain winning VTU South Zone

Rated 1563 under FIDE and led NIE as Captain into victory in the VTU South India Intercollegiate tournament, driven by strategic thinking and leadership.

2nd Position – Shaastra Programming Contest, Indian Institute of Technology Madras

Secured 2nd place among top national participants at Shaastra Programming Contest – 25, IIT, Madras Techfest, Chennai

Flipkart GRID 5.0 Pre-Finalist

Reached Pre-Finals in a nationwide engineering challenge by Flipkart.
